## INFRAWARE MOBILE

InfraWare Mobile is an all-in-one dictation app for the iPhone/iPad or Android smartphone that includes dictation, schedule review, editing and eSign capability. The number one question we receive concerns the editing of transcribed documents.

The editing feature is available with the iPhone and will be added to the Android edition of the app very soon. Here is a link to a video that provides more detail on this feature: [Click Here For Video.](#)

The recordings from the mobile phones are high quality without the complications of mobile drops or static from a poor cellular range.

To effectively manage data usage, InfraWare Mobile allows you to select whether to upload dictations via WiFi only or via an LTE mobile network.

InfraWare Mobile is a free download from the App or Play Store and can be used by any author utilizing the InfraWare 360 platform. Download by searching either store for InfraWare Mobile. For a demonstration video, search InfraWare Mobile Demo on YouTube.
